No	AND		12SMNR	Senior Seminar (Capstone)														
															Total Credits	36.00		

Numbers with a \* are considered the most important to understand and view when looking at the CAPP Report. These are the most helpful and critical pieces of information that the CAPP provides. They are also underlined in yellow on the screen shot above. Please note that items on the CAPP Report in Red indicate an unmet requirement.

- \* **Group: Core I Requirements: Not Met** – This is the heading above each group of requirements. The titles will be different based on which requirements the group represents. When all requirements in the group are complete “Not Met” will change to “Met”
- \* **Met** Column – This column shows whether or not each individual requirement within the group has been met. If it says “Yes” the requirement is complete. If it says “No” the requirement is not complete.
- \* **Condition** Column – This column will always say “And” and it just means that you must do each requirement on the list. For example, you must do Writing “And” Arts “And” PE, etc.
- \* **Rule** Column – This is the name of the rule as defined within the Banner system that is used to determine which courses meet a requirement.
- \* **Subject** Column – Here you can find a short description of what you must take in order to complete any given requirement. You can match the two letter attribute code at the end of the line with courses in the catalog to find one to fulfill the requirement.
- \* **Attribute – Required Courses** Columns – These columns are not used so they will not have any information in them.
- \* **Term** Column – This is the term in which you took the course used to satisfy a requirement. If you transferred the course in, it will be the term in which the course was transferred.

- 8.\* **Subject** Column – This is the four digit subject heading of the course used to satisfy a requirement.
- 9.\* **Course** Column – This is the number of the course used to satisfy the requirement. If it has a TR after the number (100TR) it means the course is a general 100 level transfer course without a specific PLU equivalent course.
- 10.\* **Title** Column – This is the title of the course used to complete a requirement
11. **Attribute** Column – This column shows the course attribute that is used to meet the requirement. Course attributes are defined in Banner and used to indicate which GUR(s) a course can meet.
- 12.\* **Credits** Column – This is the number of semester hours that each course is worth. The bottom of this column features the total semester hours for all of the courses in the group, both completed and registered.
- 13.\* **Grade** Column – This is the grade that was earned for the course. If there is no grade listed, it's because the course is in progress and/or you are currently enrolled in it. If the grade has a "T" in front, such as TA- or TC, it means Transfer. Transfer courses are not calculated into your PLU GPA.
14. **Source** Column – This column indicates the part of your student/academic record used to fulfill a particular requirement.
  - H: Academic History – Courses from PLU that are complete
  - R: Registration – Courses that are in progress and/or you are currently enrolled in
  - T: Transfer – Courses that you transferred to PLU
  - Z: Student Attribute – Codes used to identify particular student record details
