Come join the Graduate Group in*

AGRICULTURAL & ENVIRONMENTAL CHEMISTRY

AT THE UNIVERSITY OF CALIFORNIA, DAVIS

PROGRAM HIGHLIGHTS

Agricultural & Environmental Chemistry is the oldest interdepartmental graduate group at UC Davis. We are renowned for our multidisciplinary approach to research in applied chemistry and an exceptional breadth and depth of courses.

Faculty

Our Graduate Group boasts an energetic and diverse faculty with national and international recognition and well-funded research programs across a broad spectrum of fields.

Funding

Ph.D. students are financially supported through research grants, teaching assistantships, and/or fellowships.

- Support covers tuition, health insurance, fees and stipend
- Starting stipend is approximately \$32,000/year

Applying

If you are interested in using chemistry to solve important problems, we encourage you to apply to our program at <https://grad.ucdavis.edu/admissions>.

GRE scores are not required.

Areas of Specialization

- ♦ Environmental and Analytical Chemistry
- ♦ Biological and Toxicological Chemistry
- ♦ Food and Wine Chemistry
- ♦ Fiber and Polymer Chemistry

Recent Research Topics

- Chemistry of Pollutants in Water, Air, and Soil
- Biofuel Production
- Climate Change, Agriculture, and Water
- Advanced Techniques for Environmental, Biomedical, and Food Analysis
- Sustainable/Functional Fibers
- Toxicants in Food and Wine
