## BIOMOLECULAR SCIENCES GRADUATE PROGRAMS

### ABOUT OUR PROGRAM:

In the Biomolecular Sciences Graduate Program fuses biological, chemical and physical sciences into a single curriculum, removing traditional barriers for interdisciplinary scientific thinking and education, and to prepare the next generation of scientists for success in cross-disciplinary research and development.

You will work closely with faculty to make cutting-edge research contributions in the biomolecular sciences, engage in multidisciplinary education, establish collaborations across the program's science departments, and have the potential to interact with local industry partners. By the end of your degree, you should possess the skills and knowledge necessary to develop a successful career, whether it is in academia, the private sector, or government agencies.

This program provides a multi-disciplinary education and immersive research experience for an advanced degree in Biomolecular Sciences. We offer an M.S. and Ph.D. in Biomolecular Sciences with an average time to degree of 4.75 years +/- 0.57 years for the Ph.D., which will help you achieve your future academic and career goals.

### TO APPLY

- Complete the Graduate Application Online.
- Submit three letters of recommendation from academic or professional references that can provide an evaluation of your ability to perform and succeed at the graduate level.
- Submit a brief personal statement.
- Submit a scientific writing sample.
- Submit a CV or Resume.
- OPTIONAL: Submit official Graduate Record Exam (GRE) scores (General and/or Subject specific test) directly to the Graduate College. Our institution code number is R4018.
