

Healthy habits for women

Nothing matters more than your health – and many of the biggest health risks for women are preventable. Simple things like regular screenings and making healthy lifestyle choices can help you stay healthier, longer.

Take your health to heart

You may think of heart disease as a men's health issue – but it's not. The good news is that lifestyle changes can prevent 80% of heart attacks and strokes.* Eat right, exercise, don't smoke, and talk to your doctor about your risk.

Be proactive

Stay on top of breast and cervical cancer screenings. If you're pregnant, start prenatal care early. Share your family health history with your doctor. Most importantly, listen to your body – and get care when you need it.

Care for the whole you

With all you do, it can be easy to put your needs last, which can leave you feeling drained, stressed, or depressed. Sleeping and eating well and connecting with others is important – and if you're struggling, ask for help.
