- Room for up to 56 General Education credits (plus 4 physical activity credits) are accounted for in this plan. If a full load (16-17 credits) is not taken in every term, then both diversity credits must be double dipped in order to graduate in four years and summer school may be needed. AVOID double dipping science with diversity since the science requirement is met with the BIOL 205/206 sequence. Additional Physical Activity credits are recommended when they fit into the schedule (8 are recommended).
- Summer school may be required for students who do not take a full load (35-36 credits) during the First Year.
