It should be taken in Fall of the Senior Year if not available during this term.
Senior Year	MATH 433 MATH 499A (2 cr) Elective Elective	Elective	MATH 499B (2 cr) Elective Elective Elective	

This guide assumes readiness to take MATH 151 in Fall of the first year. If a student is not ready for that, the student should take MATH 140 in Fall of the first year, MATH 151 in Spring for the first year, MATH 152 in Fall of the second year, and MATH 253 in Spring of the second year. If a student is not ready for MATH 140 or higher in Fall of the first year, s/he should consult a mathematics professor for advising.

A grade of C or higher is required in all prerequisite mathematics courses.

This advising guide is for advising purposes only and does not denote a contract with the student or Pacific Lutheran University. Many programs have specific deadlines for application or declaration; contact the department or program chair for information. This information is accurate as of February 9, 2022;

please check with your program chair for updates to the program. The university reserves the right to make necessary changes at its discretion.

General education course requirements are listed assuming that major classes will not count toward the general education course requirements. If a course counts towards a major and a general education requirement (e.g. PSYC 101 if the student is a psychology major), students will still need to take enough courses (shown here as electives) to reach the 128 credits needed to graduate.

Mathematics Education Major Requirements
- 36 semester hours of mathematics, plus 8 to 9 semester hours of supporting courses
- [LINK TO COURSE CATALOG](#)

General Degree Requirements
- A minimum of 128 semester hours must be completed with a GPA of 2.00 or higher
- In addition to the requirements of this major, students must complete all other requirements of the University as listed in the catalog
- At least 8 semester hours for the major must be taken in residence at PLU.
