

Student-Researcher Responsibilities

The *Natural Sciences Summer Undergraduate Research Program's* available funding limits the number of student fellowships awarded. Before submitting your application, please examine your willingness to demonstrate focused interest in, and commitment to, this valuable research experience.

Student-researchers will:

- be free from other obligations, such as, summer-session courses, employment, etc., during the 10-week *minimum* of 400 research hours, which may include weekdays, evenings, weekends, and/or 24/7 field work, depending on the specific research project's nature and the demands of the research processes defined by your mentor
- expect a *maximum* \$5,800.00* research fellowship for participation in all program commitments through November (**student responsible for securing and paying one's own room and board*)
- meet formally with mentors before, and regularly during, summer research
- participate in All-Participant Professional Development Gatherings
- submit the completed Student-Researcher Program Evaluation Google form by *Thursday, 11 August 2022*
- submit a thoughtfully written Research Summary or Report that includes the research title and abstract by *Thursday, 18 August 2022*
- prepare a Research Poster and Talk for presentation at one or more PLU research events
- fully participate in the *31st M. J. Murdock College Science Research Conference (MCSRC)*, 11-12 November 2022, Vancouver WA
- uphold the highest ethical standards in research, and with respectful attitude and appropriate behavior, show willingness to engage in teamwork to fulfill all responsibilities, as requested by your assigned mentor
