P R O F E S S I O N A L S U M M A R Y

Dedicated Nursing Professional with over 8 years of experience spanning clinical instruction, public health supervision, and specialized patient care. Proven track record in developing nursing curricula, securing local funding for community health initiatives, and leading multidisciplinary teams through complex emergency preparedness and vaccine rollouts. Expert in bridging the gap between clinical excellence and organizational strategy to improve community health outcomes.

E D U C A T I O N

University of Washington – School of Nursing

Doctor of Nursing Practice – Population Health and Systems Leadership / September 2020 – March 2023

Seattle Pacific University – School of Nursing

Bachelor of Science in Nursing / September 2013 – June 2017

C L I N I C A L E X P E R I E N C E

Sexual and Reproductive Health Program / Public Health Seattle & King County

Personal Health Services Supervisor / April 2025 – Present

- Supervise clinical team of Nurse Practitioners, Medical Assistants and a Referral Coordinator at Eastgate Public Health Center and Kent Public Health Center.
- Plan and implement program and department initiatives, including transitioning lab service contractor, implementation of MPOX vaccine administration, and increasing clinic availability and annual visits.
- Support clinic-based quality improvement initiatives, including developing PAR systems for pharmacy and clinical supplies as well as developing systems for ensuring provider coverage at a clinic with only 1 nurse practitioner.
- Direct daily clinical supervision of staff including hiring, performance evaluations, training, counseling, team building and staff development.
- Volunteered as a clinical nurse supervisor for mock emergency preparation event for PHSKC testing the departments' ability to respond quickly to a hypothetical bioterrorist event involving anthrax. Developed protocols and guidance for nursing interventions and resources for community members educating on anthrax and the available treatment options.

Child Care Health Program / Public Health Seattle & King County

Public Health Nurse / December 2020 – Present

- Secured \$50,000 in funding for resource accessibility projects and strengthening relationships with Best Starts for Kids CCHC grantees.
- Maintain current knowledge of best-practice health and safety standards for child care programs.
- Educate health care providers on the differences between child care and K-12 health and safety requirements to ensure child care staff receive appropriate documentation and care plans.
- Assist in the development, approval, and periodic review of health care policies and procedures for childcare facilities in Seattle and King County.
- Review and update current health guidance and resources for childcares in King County and Washington state (COVID-19, MPox, and various child care health communicable diseases).
- Consult infant and preschool sites regarding staff and child health and safety concerns.
- Conduct health and safety assessments of childcare sites in accordance with WAC and best-practice standards.
- Assisted with grant proposal development to fund language access for the Seattle and King County childcare community.
- Best Start Kids Liaison for the Child Care Health Program, developing project proposal to increase access to equitable child care consultation services across King County.

University of Washington Medical Center / SCCA Hospital

Registered Nurse Level II / August 2017 – August 2018; May 2020 – January 2021

- Care of patients with hematological disorders with a primary focus on chemotherapy administration, stem cell and CAR-T cell transplantation, and transplant education.
- Patient care coordination between multiple teams including providers, dietitians, physical therapists, occupational therapists, and case managers.
- Maintenance of annual hospital-wide and unit-specific competencies.

University of Colorado Hospital

Registered Nurse Level II / August 2018 – May 2020

- Achieved zero central-line-associated blood stream infections (CLABSIs) on a 36-bed bone marrow transplant unit as part of a quality improvement initiative.
- Achieved a reduction in urgency-related falls as a result of implementing purposeful rounding prior to shift change.
- Care of patients with hematological disorders with a primary focus on chemotherapy administration, stem cell, CAR-T cell, and TILS/IL-2 transplantation, and transplant education.
- Patient care coordination between multiple teams including providers, dietitians, physical therapists, occupational therapists, and case managers/social workers.
- Precept new graduate RNs, new hire RNs, and traveler RNs.
- Maintenance of annual hospital-wide and unit-specific competencies.

University of Washington Medical Center / SCCA Hospital

Nurse Technician / June 2016 – July 2017

- Care of patients with hematological disorders with a primary focus on ensuring patient safety and quality of care through daily monitoring and documentation, assistance with ADLs, and communication with the patient's primary RN.

TEACHING EXPERIENCE

Clinical Nursing Instructor – Med-Surg Clinical Rotation (ABSN: NURS 403)

Pacific Lutheran University / February 2026 – Present

- Supervised multiple third semester nursing students on a variety of medical-surgical units at Evergreen Hospital in Kirkland, WA.
- Supported students with developing patient care management skills, including care provision for multiple patients and ability to provide a clear and pertinent clinical picture of the patient and their plan of care.
- Created a supportive learning environment that gave space for students to process their experiences with one another and get feedback from their peers.

Nursing Instructor – Organizational & Economic Context of Care (ABSN: NURS 408)

Pacific Lutheran University / May 2024 – Present

- Developed syllabus and updated course content to include relevant resources and external learning sources.
- Diversified learning experience in response to student feedback and to accommodate various learning styles and improve overall engagement with course material.
- Updated course assignments and structure in response to program NCLEX results to increase student preparation for Nursing Leadership content on board examinations.

Clinical Instructor – Community Clinical Instructor (ABSN: NURS 316/403)

Pacific Lutheran University / February 2024 – Present

- Supervise students at various community locations throughout the Puget Sound.
- Collaborate with various clinical faculty and SON staff to secure community clinical placements for students.
- Updated course content to create more engagement in the asynchronous environment, including live debrief sessions where students can process their clinical experiences in a group setting.

Adjunct Professor – Promoting Population Health Clinical (APNI: NURS 5031)

Seattle University / September 2023 – December 2023

- Supervise students at various community locations throughout the Seattle area.
- Supervise nursing students conducting blood pressure screening at a local food bank and guiding clinical thinking to promote a holistic theory of health inclusive of social, political, environmental, and individual determinants of health.

TYLER BREIER

- Organize and facilitate weekly seminar discussions that incorporate themes from paired population health theory course.
- Coordinate with community organization leads to ensure agency requests for deliverables are met.

Teaching Assistant – Health Politics and Policy (DNP: NSG 551)

University of Washington / January 2023 – March 2023

- Assist professor in grading policy participation assignment and discussion boards.
- Support students experiencing technical, academic, and personal issues.
- Operate Canvas site for the course, including setting up assignments and group projects.

Teaching Assistant – Community and Public Health Nursing (BSN/ABSN: NSG 420)

University of Washington / September 2022 – December 2022

- Taught lectures on LGBTQ+ health and public health ethics.
- Assist professor in grading students' writing for writing intensive course.
- Support students experiencing technical, academic, and personal issues.
- Operate Canvas site for the course, including setting up assignments and group projects.

Teaching Assistant – Healthcare Systems (BSN/ABSN: NSG 412)

University of Washington / March 2022 – June 2022

- Assist professor in grading students' writing for writing intensive course.
- Support students experiencing technical, academic, and personal issues.
- Operate Canvas site for the course, including setting up assignments and group projects.
