

Spill Cleanup Procedure

Always consult the Safety Data Sheet (SDS) for the material you spilled prior to cleanup.

If you determine you CAN clean up the spill safely:

Don PPE: gloves, eye protection, face protection, apron, etc.

Powder

Liquid

To minimize airborne dust, spray spill area with water.

Prevent spill from entering drains – use absorbent boom placed around the drain, if necessary.

Absorb spill using towels, absorbent pads, or other absorbent material.

Place saturated absorbents in hazardous waste bag

Clean spill area with water, soap or other cleaning agent & towels

Place all materials used in cleanup in hazardous waste bag

Notify EH&S Manager @ X-7233 for removal and safe storage of cleanup materials.
