PROGRAM OVERVIEW

This class is designed to increase student's overall awareness, knowledge, and perception of individuals with a disability in the United States and in England. Knowledge and techniques acquired in this class will lead students to have a better idea of how to develop, implement, and evaluate adapted physical activity programs for individuals with various disabilities. Students will also develop an appreciation for individuals with physical disabilities and for adapted athletes by actively participating in different adapted sports. We will be traveling to England to meet with professional Paralympic athletes, see the birthplace of Paralympics, and sit in on classes focusing on adapted sports at Worcester University. This class will make you rethink the capabilities of the human body.
